INTRODUCTION

Combined Electrical Contracting Services is an electrical contractor specialising in design and construction/novation type projects.

Over the past ten years our company has successfully completed projects for most of the leading construction firms in the Top End. Our client list includes, Sitzler Bros (Darwin), John Holland, Laing O'Rourke, Sunbuild and many more.

Projects we have completed range from multi-million dollar projects at Robertson Barracks to community housing projects in remote North West Australia and Arnhem Land.

We typically are responsible for most of the sub-trades to electrical on all of the projects that we are involved with. i.e. communications, fire, mechanical, MATV etc. If we cannot provide the necessary skill in-house, we have a network of sub-contractors we can utilise to provide the skills required.

We consider our company dynamic, flexible and resourceful, with the expertise and enterprise to meet all challenges that comes our way.

As well as the above projects, we have completed a multitude of smaller projects, during the same period. During the 1998 calendar year we produced **One Million Dollars** of work per month, for three consecutive months.

Management Capability

Combined Electrical has established an efficient and effective administrative and project management capability through its management team and the implementation of advanced communications systems including electronic invoicing and Internet banking facilities.

The proposed management team for these works would consist of:
